

Ricardo Arvelo Meza

Data Analyst | I'm a results-driven professional with extensive experience in the Biotech, Pharma, and Chemical industries, having worked with companies like Mettler Toledo. Specializing in strategic project management, analytical chemistry, and molecular diagnostics, I focus on aligning technology with business goals to drive innovation and growth.

Bilingual in Spanish and English, I thrive in cross-functional environments and excel at building strong relationships with both clients and teams to achieve common goals. My professional journey is defined by a passion for continuous learning and problem-solving, always seeking ways to improve operational efficiency and contribute to groundbreaking advancements.

WORK EXPERIENCE

Mettler-Toledo International, Inc Field Application & Sales Specialist – Analytical Chemistry Project & Technology Management Focus	Barcelona y alrededores, España · Jul '18 - Dec '24 • As a specialist in analytical chemistry and project implementation, I have led initiatives at the intersection of science, technology, and business—driving innovation in QC, QA, academic research, and life sciences. • My role bridges deep technical expertise with strategic project execution. • Strategic Product Leadership • Managed cross-functional projects to position analytical technologies in competitive markets. • Designed and executed product strategies aligned with client needs and market trends. • Analytical Chemistry Expertise • Applied advanced chemical analysis techniques for method development, troubleshooting, and training. • Oversaw instrument validation and data integrity in regulated environments. • Quality Systems Management (QC/QA) • Ensured rigorous compliance through robust quality control protocols. • Coordinated quality assurance initiatives aligned with ISO and GxP standards. • Scientific Research & Development • Supported academic and industrial partners in developing innovative analytical methods. • Promoted scientific advancement in complex biological and chemical matrices. • Life Science Applications • Implemented analytical solutions for biotechnology, pharmacology, and molecular biology projects. • Enabled biomolecular characterization and bioanalytical workflows. • Marketing & Client Strategy • Designed tailored commercial and training plans for clients across biotech and academia. • Drove customer engagement through technical excellence and reliable support. • Working closely with Customer Success teams, I ensured timely delivery, solution alignment, and long-term value for clients—building lasting partnerships grounded in science and service.

STAB VIDA

**Business Development
Facilitator – Genetics &
Molecular Diagnostics |
STAB VIDA**

Barcelona y alrededores, España · Nov '16 - May '19

- Led business development projects in the molecular biology and genetics sector, with a strong focus on oncology and gene-related diseases.
- Acted as a strategic interface between commercial, technical, and scientific stakeholders in the Pharma-Biotech and R&D space.
- Strategic Market Development
- Designed and executed growth initiatives for genetic testing and sequencing services.
- Identified emerging opportunities in diagnostics and personalized medicine.
- Project & Partnership Management
- Facilitated cross-sector collaboration with research centers, biotech firms, and diagnostics labs.
- Managed client pipelines and guided scientific discussions from need identification to service implementation.
- Market Intelligence & Business Strategy
- Conducted in-depth analysis of market dynamics, trends, and regulatory frameworks.
- Translated insights into actionable plans aligned with ISO and quality standards.
- Commercial & Scientific Impact
- Contributed to STAB VIDA's expansion in Europe as a trusted provider of genetic technologies.
- Supported key revenue-driving initiatives through technical consultancy and client engagement.

We are the company, S.L
**Chief Technology Officer
(CTO) | QC-QA Advisor**

Barcelona y alrededores, España · May '16 - Nov '18

- Led the technological and quality assurance strategy for an independent craft beer venture, aligning innovation with high production standards and brand development goals.
- Technology Leadership & Process Optimization
- Directed digital transformation efforts to streamline brewing operations, supply chain logistics, and customer experience.
- Integrated scalable solutions to enhance traceability, batch consistency, and team coordination.
- Oversaw tech adoption across departments, ensuring alignment between production workflows and business objectives.
- Quality Control & Assurance (QC/QA)
- Designed and applied rigorous QC protocols across brewing stages—from raw material selection to final packaging.
- Performed microbiological and physicochemical assessments (e.g., pH, gravity, cell counts, sensory analysis).
- Ensured compliance with brewing quality standards (ASBC), contributing to flavor stability and product differentiation.
- Cross-functional Collaboration & Continuous Improvement
- Worked closely with R&D, production, and marketing teams to deliver a premium and consistent craft beer portfolio.
- Established feedback loops and corrective action processes to drive continuous improvement and consumer trust.

VIRCELL S.L.
Research Assistant | R&D
Molecular Biology

Granada y alrededores, España · May '15 - Oct '15

- Project Lead – IVD System Development for HPV Detection
- Academic/Research-Based Project
- Led the development and optimization of a rapid, point-of-care molecular diagnostic system for high-risk HPV detection, contributing to innovation in women's health and molecular diagnostics.
- Project Scope & Execution
- Collaborated with multidisciplinary teams to design and validate a novel HPV genotyping assay.
- Developed a multiplex RPA-CRISPR/Cas12a-based system, enhancing detection sensitivity and specificity.
- Integrated purified HPV DNA controls and adapted the system across multiple molecular platforms.
- Key Outcomes
- Improved diagnostic accuracy and efficiency, supporting early-stage detection and clinical decision-making.
- Presented project findings at conferences, boosting visibility and positioning for potential commercial applications.
- Technical & Collaborative Skills
- Molecular Techniques: PCR, qPCR, RPA, CRISPR/Cas systems.
- Assay Design & Optimization | IVD Validation | QC in Molecular Diagnostics
- Cross-functional teamwork and research-to-market translation.

Clinical laboratories
"Belenus"
Associate Founder

Caracas, Venezuela · Sep '13 - Feb '15

- Led the development and implementation of online services and digital platforms to enhance patient accessibility and streamline appointment booking and result delivery.
- Designed and executed data-driven marketing campaigns across multiple digital channels, increasing brand awareness and customer engagement.
- Collaborated closely with technical and healthcare teams to ensure compliance, optimize workflows, and maintain service excellence.
- Played a key role in the strategic positioning of the laboratory within the competitive healthcare market.

clinical laboratories K-21
General Manager

Caracas, Venezuela · Jul '12 - Sep '13

- Led and managed the daily operations of Clinical Laboratories K-21, optimizing clinical processes and ensuring high-quality laboratory services.
- Supervised a multidisciplinary team, implemented strategies to enhance operational efficiency, and fostered a culture of excellence in customer care.
- Successfully increased client satisfaction by introducing new technologies and improving result turnaround times.
- Ensured full compliance with health and quality regulations across all processes.

Lopcymaster
General Manager

Caracas, Venezuela · Jul '12 - Sep '13

- Oversaw the strategic and operational management of lab-based services focused on human resources profiling, including biochemical and psychometric assessments for recruitment and occupational health purposes.
- Led cross-functional teams in the development and delivery of customized testing solutions tailored to corporate clients.
- Implemented data-driven protocols to ensure reliability and confidentiality of candidate evaluations, aligning services with current labor regulations and best practices.
- Acted as the primary liaison with business partners and stakeholders to expand service reach and build strong client relationships.

	Laboratorio de Neurodiagnostico "Dr. Pablo Ordaz" Bioanalist	Caracas, Venezuela · Jan '11 - Jul '12 - Specialized in the analysis of cerebrospinal fluid (CSF) to support the diagnosis of neurological pathologies, including infectious, inflammatory, and neoplastic conditions. - Performed cytological and microbiological evaluations of various human body fluids such as synovial, pleural, pericardial, and ascitic fluids. - Ensured high standards of precision and quality control in sample handling, processing, and reporting. - Collaborated with neurologists and clinical teams to provide timely and accurate diagnostic support.
	Unidad Clínica el Recreo (UCR) Caracas Venezuela Head of Laboratory	Caracas, Venezuela · Jan '11 - Jul '12 - Led the clinical laboratory department in a private healthcare facility specialized in aesthetic and cosmetic surgery. - Managed preoperative and postoperative laboratory testing, ensuring accurate and timely results to support patient safety and surgical outcomes. - Coordinated a small multidisciplinary team, optimized workflows, and maintained strict quality control and biosafety standards. - Developed internal protocols aligned with national health regulations and adapted services to the specific needs of cosmetic surgery patients.
	Microbiological laboratory diagnosis at Amazon Center for research and control of Tropical Diseases Field Research Assistant	Amazonas Area, Colombia Venezuela Brasil · May '10 - Oct '10 - Participated in a multidisciplinary field study focused on the epidemiology and impact of tropical diseases in vulnerable communities across the tri-border Amazon region. - Supported public health initiatives by assisting in sample collection, clinical data gathering, and community health education. - Collaborated with local health authorities and international researchers to identify disease patterns, promote prevention strategies, and facilitate access to basic healthcare services. - Contributed to field logistics in remote areas, demonstrating adaptability, cross-cultural communication, and a strong commitment to global health.

EDUCATION	Reboot Academy	Data & AI Specialist Bootcamp Data Science and Artificial Intelligence · Graduation: Aug '25
	University of Granada	M.Sc. Biotechnology industry (Bioenterprise) · Graduation: Jan '15 Granada Spain
	Central University of Venezuela	Bachelor's degree Bioanalysis · Graduation: Jan '10 Caracas, Venezuela

PROJECTS	CO2 Emission Analysis	Apr '25 As part of the Reboot Academy bootcamp, conducted a data-driven environmental project focused on analyzing global CO₂ emissions patterns.
		Objective: To identify temporal and geographic trends in CO ₂ emissions and uncover insights that could inform sustainable development policies. Main contributions: - Processed and cleaned multi-country CO₂ emissions data spanning several decades - Performed exploratory data analysis to detect trends by country, continent, and income group - Visualized data using heatmaps, time series, and comparative bar charts with `Plotly` and `Seaborn` - Investigated per capita and cumulative emissions across time to evaluate

disparities and major contributors

- Interpreted insights through a sustainability and policy lens, crafting recommendations based on findings

****Skills Used**:** `Pandas`, `Plotly`, `Seaborn`, `EDA`, `Data Cleaning`, `Data Visualization`, `Environmental Analytics`

Sales Analysis -Retail

Feb '25

- Sales data analysis project conducted as part of the Data & AI Specialist Bootcamp at Reboot Academy.

Objective:

To derive business insights and optimize retail operations based on historical sales data from a company in the office supply, technology, and furniture sector.

Main contributions:

- Cleaned and structured raw data from multiple sources (customers, orders, shipping, and products)
- Performed exploratory data analysis (EDA) to identify sales trends, geographic performance, and product segmentation
- Built interactive dashboards using Google Looker Studio/ Power BI to visualize key indicators (sales by region, category, customer segment)
- Applied basic machine learning to forecast sales based on historical patterns

Skills used: `Data Analysis`, `Data Cleaning`, `Exploratory Data Analysis`, `Power BI`, `Python`, `Data Visualization`

Improving IVD System Development for HPV Detection

Oct '14

- Led the design and optimization of a rapid, multiplex-based diagnostic system for high-risk HPV detection.
Collaborated with multidisciplinary teams to develop a sensitive and scalable point-of-care IVD tool.
Improved diagnostic speed and accuracy, supporting early detection in women's health applications.

Antigen Production for Serological Diagnosis of Deep Mycoses (Histoplasma capsulatum)

Jan '10

- Undergraduate thesis focused on the experimental production of fungal antigens for the serological diagnosis of systemic mycoses caused by *Histoplasma capsulatum**.
Project involved antigen extraction, purification, and immunoassay development to improve diagnostic sensitivity.
Conducted at the Instituto de Biomedicina del Hospital Vargas under the Department of Medical Mycology.
